Abstract

Deliverers Power Token (DPT) is a decentralized platform which affords delivery drivers a greater ability to choose their jobs, a greater share of the revenue, and benefits typically given to full time employees. At the same time, Deliverers Power Token provides a safe, uncomplicated and fast job sourcing platform, allowing parcel companies to source last-mile fulfilment of delivery from a pool of freelance drivers with less overhead due to the elimination of a middle man. For drivers, the platform creates a pooling effect allowing for benefits such as insurance and electric car financing. The platform utilizes a secure escrow system that reduces the bureaucratic overhead of a delivery and time to payment.

Deliverers Power Token is holding a crowdsale event of DPT Tokens. Tokens are utility tokens which will be used to facilitate distribution of all profits made by the Deliverers Power Token platform, in addition to all profits made by new business ventures under the Deliverers Power Token umbrella. Token holders will additionally receive airdrops of new ICO tokens listed on the Deliverers Power Token platform.

The platform implements a novel approach to traditional last-mile delivery by utilizing blockchain technology to enable smart contracts that automate the scheduling and payment of a delivery job.

Last-mile deliveries in their current form are fraught with inefficiencies, security risks, and unreasonable middleman fees.

Problem Overview

The Challenge:

DPT wants to build a decentralized ecosystem to change the vulnerable position of deliverers with respect to the large companies in the parcel and delivery industry that dominate the space. The goal is to transform this industry of \$350 Billion in 2020 to one that produces zero emissions by giving the deliverers more power.

Start

DPT will start locally and everyone can join the platform whether they are a professional (self-employed) deliverer, or just someone wanting to make extra money in their spare time. Parcels will be collected locally by consumers, businesses, product manufacturers and webshops.

Trend in the world

Once a critical mass of drivers has joined the platform, DPT can meet the desire of customers and manufacturers to do business directly without a third party. The value per parcel will be greater because in our platform we will take out the middleman.

Creating the Solution

The Goal

To make the parcel industry better for drivers and for the air we breathe!

The Solution

Deliverers Power Token brings consumers, companies, deliverers and investors together in a single decentralized network, using blockchain technology, to disrupt the delivery market by cutting out the middleman to build a more efficient delivery network that saves money for shippers, earns more money for drivers, and helps reduce pollution all at the same time.

To start, our platform will be offered only in local markets, handling last-mile and intra-city deliveries (within a radius of 20 miles, for longer distance deliveries, the parcel will be dropped off to our long distance delivery partner). Our custom built platform allows businesses and individuals to book delivery in a few, simple steps. Much like Uber, drivers can accept the delivery request from the convenience of our driver app. And, just like in traditional deliveries, the driver delivers the parcel with their own car or one provided by the DPT platform.

How it works

For the booker

To incentivize usage of the platform and to promote network effects, both individuals and businesses earn \$0.05 DPT for each delivery booking. The delivery fee goes directly to the deliverer.

For the Deliverer

Unlike the current system, where the driver gets only a small portion of the booking fee, DPT cuts out the middleman to give drivers better pay. Not only do they get paid better, but they also have opportunities to earn extra income through our unique menu of extra services. DPT isn't just a one dimensional business, we take a holistic approach that aims to improve outcomes for everyone in the ecosystem – consumers, businesses, and drivers. To this end, DPT will also provide a labour agreement for the drivers that solves issues like insurance and immediate fee remittance through smart contracts. The net effect for the driver being a larger take-home wage and more security of payment. Additionally, there will be a significant barrier to entry into this job because of stricter regulation of combustion engine vehicles. Whether someone is a professional driver, student, or part-timer looking to earn some extra money on the side, we will offer zero emission vehicles through our financing plans.

For the Community

We want to help our community by making a better living wage for these drivers, but we also want to help our community by helping to take care of our environment. Last-mile deliveries are typically the most polluting. Thankfully the government is starting to realize this and regulate these vehicles. We want to be pro-active and ahead of the curve. Our goal is to have a 100% zero-emission fleet.

Deliverers Power Token Tokens

Token overview

Dividend and voting tokens

For each parcel delivered \$0.15 DPT are paid as a dividend to the investment pool. To incentivize the financing of zero-emission vehicles, an additional \$0.05 DPT is offered for deliveries using electric cars.

Currencies offered as dividend payment

Payment currencies ETH, BTC, Litecoin, Dash, USD, EUR, GBP, AUD, NZD, CAD & more

Decentralization of ownership

Tokens owners are valuable members of the Deliverers Power Token community. As such, they are entitled to provide input in all facets of site development, new business ventures, as well to have complete ownership of their respective share of profits. These voting rights include uses of the site's revenue. No significant new ventures will be undertaken without a vote amongst holders of the public issuance. All holders who wish to participate will vote in a proof-of-stake system handled by the issuance of a voting asset which can then be used in a public and transparent democracy contract. The democracy contract is open source and the outcome of votes publicly tallied.

Transparency

Deliverers Power Token will provide an open and transparent exchange to its Token holders. The blockchain itself will provide an unforgeable record of all dividend payouts to Token holders. Deliverers Power Token will have a continuous, transparent, and blockchain-based overview of all cryptocurrency revenues generated and to be distributed. Each monthly Token holder announcement will detail developments of the platform and issues which will be voted on by Token holders before the next announcement. These issues will include new-venture projects, new coins added to the exchange, design considerations, and more. Token holders may submit questions to be voted on through the platform's integrated community forum. All the code of both Smart Contracts and Platform DApp will be verified on Etherscan and open-sourced on GitHub for additional confidence in its veracity. Furthermore, DPT, will give holders rights in order to be an active part of key platform decisions, much like in a Decentralized Autonomous Organization (DAO). Tokenholders have the following rights:

- Right to vote on platform key decisions
- Right to have a discount on platform fee when start a crowd sale
- Right to rate crowd sales started on DPT
- Possibility to promote Crowdsale on DPT social and media channels

We may always add rights for token holders, in that case we will communicate them on our official channels.

Token ICO Issuance

General overview

Token code: DPT

Price per DPT: 0.000167 ETH (1 ETH = 6000 DPT)

DPT maximum total supply: 5,000,000,000

(Available through private sale, pre-ICO/presale/ICO 2,550,000,000)

Token freeze: partial

Token burn: all unsold tokens during Crowdsale

Payment currencies: ETH, BTC, Litecoin, Dash, USD, EUR, GBP, AUD, NZD, CAD & more

Soft Cap: no softcap

Absolute Hard Cap: \$204,000,000 USD

Bonus structure: See referral program

Transparency: Open source (public Github)

Timetable Crowdsale

Private sale started on 27 July 2018 - 31 December 2018 (100% bonus)

Round 1: Januari 1st until Februari 20th 2019 (50% bonus)

Round 2: February 21th until April 20 th 2019 (25% bonus)

Round 3: April 22 th until June 20 th 2019 (0% bonus)

51%: maximum allocation to investors through entire crowdsale with burn of unsold

29%: allocated to a reserve fund, the use of which is voted on by investors

15%: allocated to the development team (frozen by contract for 1 year)

2.5%: allocated to bounty program for community engagement

2.5%: allocated to advisors

Allocation of Tokens after ICO

Hard and Soft Capitalization

The minimum tokens available for purchase of Tokens during the crowdsale are: Ethereum (ETH), Bitcoin (BTC), Litecoin, Dash). Purchase via SWIFT transfer in fiat currency may also be made directly using: US Dollar (USD), Euro (EUR), British Pound (GBP), Australian Dollar (AUD), Canadian Dollar (CAD) & New Zealand Dollar (NZD). SWIFT transfer can be made in other currencies, however this is subject to a standard exchange rate fee. Tokens paid for via SWIFT transfer are released upon settlement of the transaction by our corresponding bank. Additional crowdsale tokens may also be available if development time allows.

Initial pricing for the Tokens is currently set at 0.000167 ETH (1 ETH = 6000 DPT). Other payment currencies are set at equivalent ETH value. This is subject to change should there be a large shift in the price of ETH/USD to ensure the hard cap is maintained.

There is no soft cap for this project. The founding team believes strongly in this project and has committed to making up the difference for any shortfall in funding.

The hard cap for the Token crowdsale event is \$204,000,000 USD in total value of all sale currencies. Should this hard cap be reached the crowdsale will be closed and all remaining Tokens on offer are burned. This limit was chosen to give investors confidence in the maximum amount their equity in the site can be diluted, and to increase the value of the investment for all holders of Tokens.

Crowdsale referral structure

1. All users will have a unique referral link to share on social media's.
2. When any user will click on shared link, it will be redirect to our ico website for join.
3. After register (the user who click on link), when user purchase any amount of token from website.
4. The user who shared link, will get some percent of bounty reward (Tokens whose amount will be decided from admin side) in its wallet.

Example - "John" share its DPT referral link on Facebook, now "Mark" click that link and register to DPT website. "Mark" invest some Ether let say 0.5 Ether on DPT website for purchase token, in 0.5 Ether "Mark" will get 3000 DPT token (1 Ether = 6000 DPT). Now we look that "Mark" is referred by "John" and also look for the referral bounty % setting let say you set it to 15%, So the 15 % of 3000 DPT (that Mark Purchase) is 450 so we will reward John with 450 DPT token.

Note: Deliverers Power Token has the right to not issue rewards for links considered as fraudulent (for instance, links generated by automated tools). DPT is the sole arbiter and holds the final control of these decisions.

DPT Platform

Risk Factors

The purchase of tokens involves a high degree of risk. Before acquiring tokens, it is recommended that each participant carefully weigh all the information and risks detailed in this Whitepaper, and specifically, the following risk factors:

- **Dependence on infrastructure:** Ethereum and the Internet implies that Deliverers Power Token can offer no assurances that a system failure would not adversely affect our software. Break-ins, network delays or other disruptions caused by third parties may result in interruption, delay, or even suspension of services, which would limit the use of the tokens.
- **Smart contract limitations:** Smart contract technology is still in its early stages of development, and its application is experimental in nature. This carries significant operational, technological, regulatory, reputational and financial risks. Deliverers Power Token cannot serve as any form of warranty, including any expressed or implied warranty that the Deliverers Power Token Smart Contract is fit for purpose or that it contains no flaws, vulnerabilities or issues which could cause technical problems or the complete loss of tokens or funds.
- **Regulatory risks:** Blockchain technology, including but not limited to, the issue of tokens, may be a new concept in some jurisdictions, which may then apply existing laws or introduce new regulations regarding Blockchain technology-based applications. Such regulations may conflict with the current Deliverers Power Token smart contracts and token concept. This may further result in the need to make substantial modifications to our smart contract, which may include, but not limited to: its termination, the loss of tokens, and the suspension or termination of all token functions.
- **Taxes:** Token holders may be required to pay taxes associated with the transactions contemplated herein in their home countries. It is the sole responsibility of token holders to comply with any and all tax laws of the jurisdictions applicable to them, and that they pay all relevant taxes.
- **Force Majeure:** Deliverers Power Token' performance may be interrupted, suspended or delayed due to force majeure circumstances. For the purposes of this Whitepaper, force majeure shall mean extraordinary events and circumstances which could not be prevented by us and shall include: acts of nature, wars, armed conflicts, mass civil disorders, industrial actions, epidemics, lockouts, slowdowns, prolonged shortage or other failures of energy supplies or communication service, acts of municipal, state or federal governmental agencies, other circumstances beyond our control, which were not in existence at the time of Whitepaper release. If such circumstances occur prior to the issue of tokens and Deliverers Power Token is unable to issue tokens within one month from the projected date, the escrow agent may issue a refund at the request of the token purchasers. The refund will be issued in the original amount and form of payment to the same digital wallet where the funds were transferred from.
- **Disclosure of information:** Personal information received from token holders, the information about the number of tokens owned, the wallet addresses used, and any other relevant information may be disclosed to law enforcement, government

officials, and other third parties when Deliverers Power Token is required to disclose such information by law, subpoena, or court order (also if all information are already public due the nature of the blockchain and our use of it). Deliverers Power Token shall at no time be held responsible for such information disclosure.

- Value of token: Once purchased, the value of the token may significantly fluctuate due to various reasons. Deliverers Power Token does not guarantee any specific value of the token over any specific period of time. Deliverers Power Token shall not be held responsible for any change in the value of the token.
- Started Crowdsale: Except with regard to its own crowdsale and explicitly expressed in this Whitepaper, Deliverers Power Token does not guarantee any responsibility on a crowdsale started by a third party. Deliverers Power Token has no control over the actions of the projects' teams. Deliverers Power Token will provide its tools to any project, however, Deliverers Power Token shall not be responsible for the completion or success of any crowdsale, nor of any such failure resulting from the actions of the project teams or third parties. Responsibility of any third party crowdsale is to be accomplished by the crowdsale creator and any other information on third party crowdsale shall be inferred by their own Whitepaper and official links.
- Ethereum volatility: Deliverers Power Token' services are priced in Ethereum. The Ethereum exchange rate volatility may impact the company's ability to provide services at the indicated prices. DPT is a utility token meant for use in the DPT platform and it is transferable. However, while we are aware that the token is currently being traded on the exchanges listed here and elsewhere, we have not encouraged or facilitated this exchange trading in any way. We provide the aforementioned information solely as a means of reducing the inquiries we receive directly.

DPT is a utility token meant for use in the DPT platform. It is transferable. While we are aware that the token is currently being traded on the exchanges listed, we have not encouraged or facilitated this exchange trading in any way. We provide the foregoing information solely as a means of reducing the inquiries we receive directly.

Assumptions with respect to the foregoing involve, among other things, judgments about the future economic, competitive, and market conditions as well as business decisions - most of which are beyond the control of the Deliverers Power Token team and therefore difficult or impossible to accurately predict. Although the Deliverers Power Token team believes that the underlying assumptions in its forward-looking statements are reasonable, any of these may prove to be inaccurate. As a result, the Deliverers Power Token team can offer no assurances that the forward-looking statements contained in this Whitepaper will prove to be accurate. In light of the significant uncertainties inherent in the forward-looking statements contained herein, the inclusion of such information may not be interpreted as a warranty on the part of Deliverers Power Token, nor any other entity that the objectives and plans of the Deliverers Power Token project will be successfully achieved. Please note that the Deliverers Power Token project may be subject to other risks not foreseen by its team at this time.

Platform Overview

Deliverers Power Token brings consumers, companies, deliverers, and investors together in a single decentralized network, using blockchain technology, to disrupt the delivery market by cutting out the middleman and transfer the parcel industry into zero emission. This industry is expected to grow to \$350 Billion by 2020 yet the drivers are continually paid less and less. DPT aims to reverse this trend by cutting out the middleman (with their associated fees) so that the driver takes home more pay. At the same time, DPT will help reduce the carbon footprint of the industry by facilitating the conversion to electric vehicles through a lease/buy program to the drivers.

Our platform starts locally, consumers and businesses can book their parcel very easy online via DPT platform. All drivers will get an app and can except this booking. The selected driver will collect the parcel and can use their own (zero, or almost zero emission) vehicle or the zero emission vehicle (car, scooter or bike) provided by the DPT platform to deliver local parcels(20 miles). Parcels outside of this radius will be delivered to our long distance partners who will take it to another DPT deliverer near the destination or fulfil the last mile themselves if out of our coverage area.

Escrow System

51%: maximum allocation to investors through the entire crowdsale. These tokens are transferable after the crowdsale. While we are aware that the token is currently being traded on the exchanges listed here and elsewhere, we do not encourage or facilitate exchange trading in anyway. Token holders who do so, do so at their own risk and discretion.

29%: allocated to a reserve fund, the use of which is voted on by investors.

15%: allocated to the development team (frozen by contract for 1 year) After one year these tokens can be transferred to any exchange but not redeemed.

2.5%: allocated to bounty program for community engagement these token can be transferred after the crowdsale to any exchange but not redeemed.

2.5%: allocated to advisors these token can be transferred after the crowdsale to any exchange but not redeemed.

Dispute Resolution

In the event of any controversy, dispute or claim (a Dispute) arising out of or relating to any Parties rights or obligations under this Agreement (whether arising in contract, tort or otherwise) (including the interpretation or validity of this Agreement), such Dispute shall be resolved in accordance with the dispute resolution process referred to in the Supplemental Documentation Addendum(to be provided later).

User Feedback

DPT aims to be a responsive and inclusive platform for all participants of the parcel industry it services. To this end, constructive user feedback is always welcome. Any suggestions, comments, or feedback can be submitted via email through feedback@delivererspowertoken.com. Any bug fixes should be submitted through the bug reporting feature of the platform.

Community Engagement

The success of DPT is dependent upon the acceptance and support of the parcel industry. We want to actively engage with all participants and so have community discussion boards on the platform. While we actively monitor the channels to keep the conversation civil, productive, and in compliance with our Community Code of Conduct, we otherwise do not censor any comments or threads. Additionally, we actively maintain social media profiles. Deliverers are encouraged to follow us on Twitter, Facebook, and Instagram.

Security

As we are using state-of-the-art servers with dedicated managed by a professional company to ensure maximum security and uptime of our servers.

The highest possible uptime and 24/7 support with guarantees on resolution times. If DPT website is unexpectedly down, we will have a technical engineer who will correct the storage within 1 hour.

- We monitor the server 24/7 on all services running on the server
- We manage the server and take care of security updates, so the server does not get hacked.

Simplified Fee Structure

1. All users will have a unique referral link to share on social media's.
2. When any user will click on shared link, it will be redirect to our ico website for join.
3. After register (the user who click on link), when user purchase any amount of token from website.
4. The user who shared link, will get some percent of bounty reward (Tokens whose amount will be decided from admin side) in its wallet.

Example - "John" share its DPT referral link on Facebook, now "Mark" click that link and register to DPT website. "Mark" invest some Ether let say 0.5 Ether on DPT website for purchase token, in 0.5 Ether "Mark" will get 3000 DPT token (1 Ether = 6000 DPT). Now we look that "Mark" is referred by "John" and also look for the referral bounty % setting let say you set it to 15%, So the 15 % of 3000 DPT (that Mark Purchase) is 450 so we will reward John with 450 DPT token.

Roadmap

(see website for latest updates)

Value Proposition

Deliverers Power Token brings consumers, companies, deliverers and investors together in a single decentralized network, using blockchain technology, eventually evolving the delivery market and transforming the parcel industry into a zero emission industry. The parcel industry is expected to grow to \$350 billion by 2020. The biggest problem today is that the deliverer are unhappy and underpaid for the services they render whereas last mile creates the most emissions in the chain. Regulation and public sentiment means the future belongs to cleaner industries.

DPT solves this issue by paying the drivers better than now by cutting out the middleman and immediately after parcel delivery, creating an opportunity for everyone to earn some extra cash by offering our unique menu with extra services. DPT will also provide a decent labour agreement for the drivers solving issues like insurance and retirement. All customers will get \$5 cent equivalent in DPT for each booking made.

Parcels can be booked online via DPT platform by consumers and businesses, DPT app will be given to drivers for booking acceptance and delivers the parcel using their own vehicle or DPT emission free vehicles provided by the platform.

We believe decentralized collecting, offering more services and delivering of parcels has the future therefore our platform starts locally. After a decent training the deliverers will get a playing field of 20 miles anything greater than that will be taken care of by a partner in the platform after the drivers drops it to them. Whether you are a student, (part-time) professional driver, customer, investor, partner or a cleaner environment advocate go to the Deliverers Power Token website and sign in.

Let's make the parcel industry healthy for the drivers and the air we breathe!

Value Overview

At this moment every household receives or sends about 30 parcels per year. We aim at 5% of this business within 5 years which means about 1.7 billion parcel per year. DPT platform will earn about \$0.20 per parcel net. With the volume we are expecting, this should result in \$ 875,000,000,- per year profit.

Delivery Index – Sector Analysis

The parcel industry will be \$350 billion industry in 2020 and will grow each year. Last-mile deliveries are typically the most polluting. Thankfully the government is starting to realize this and regulate these vehicles. We want to be pro-active and ahead of the curve. Our goal is to have a 100% zero-emission fleet.

Revenue Projection

The average parcel price (up to 10 kg) is approximately \$ 4.00 for the domestic market of which, the (self-employed) driver earns approximately \$ 1.00 per parcel. A driver must pay for all of his/her costs with this revenue, car, petrol, insurance etc. The rest (\$ 3.00) is eaten by the present network. In most cases the consumer has to deliver their parcel to a drop-off point somewhere in town.

When the customer books a parcel with DPT platform, we can reasonably expect to ask at least the going rate of \$ 4.00 as we are collecting the parcel from their doorstep. Additionally, all customers will get \$0.05 equivalent in DPT coin for each booking made.

If we provide the electric vehicle to the drivers, our operating cost (based on \$ 4.00) is much lower than the traditional combustion engine vehicle. This gives the driver a healthy income and insurance without the additional financial or mental burden of converting their car to electric to be in compliance with expected future emissions regulations. DTP platform will earn a profit minimum of \$ 0.20 per parcel.

About the Team and the Company

Your Own Coin is located in the Netherlands in Valkenswaard and built a professional team for DPT network using best in class for each type of work needed. See our website for the latest team members and their bios.

FAQ

What does DPT stand for and what is it?

Deliverers Power Token. It is a utility token based on Ethereum technology that can also be used as a unit of account between drivers, customers, partners, and users in a new, blockchain-based delivery and services platform. The token is not a digital currency, security or a commodity.

Are DPTs transferable? Where are DPTs traded?

DPT is a utility token meant for use in the DPT platform. It is transferable. While we are aware that the token is currently being traded on the exchanges listed here and

elsewhere, we have not encouraged or facilitated this exchange trading in any way. We provide the foregoing information solely as a means of reducing the inquiries we receive directly.

What do DPTs represent?

The utility tokens are intended for use on the DPT platform, a new Blockchain-based delivery and services platform. Ownership of the tokens carry no rights other than the right to use them as a means to obtain services on the DPT platform, and to enable usage of and interaction with the platform, if successfully completed and deployed. The tokens do not represent or confer any ownership right or stake, share or security or equivalent rights, or any right to receive future revenue shares, intellectual property rights or any other form of participation in or relating to the DPT platform, and/or its affiliates. The tokens are not refundable and are not intended to be a digital currency, security, commodity or any other kind of financial instrument.

Where will DPT be used?

We are building the DPT platform with a DPT wallet and related blockchain-attested functionality. The utility token is for conducting transactions and obtaining services on the platform.

Given the open-source nature of the project, however, we also envision that as we develop the DPT, third-party developers may come up with new and novel uses for the token.

These apps must be fraud-resistant if they are to participate.

Why generate a distinct token, as opposed to using Bitcoin?

DPT is not a digital currency, it is a utility token. It can be used as a unit of account between drivers, partners and users on the DPT platform, and can be utilized to directly measure, exchange, and verify attention. Bitcoin would not enable this distinct, in-platform problem solving. Also, an integral part of the token sale was the creation of the DPT which will be used to incentivize users to join the DPT platform. Finally, using DPT on Ethereum allows for faster scalability than using Bitcoin.

How do I view DPT tokens in my wallet?

You can view DPT token balance in your non-hosted Ethereum wallet that supports ERC20 tokens by watching the DPT contract.

- DPT Smart Contract address: <https://ropsten.etherscan.io/token/0x490299562b4de62b0d00b86105cc6845bcd4a988>•

Number of Digits: 18

- Symbol: DPT

Which wallets can be used to store DPT?

DPT is an ERC20 token, and can be stored in ERC20 compatible wallets. We do not recommend a particular product, but some users report storing their DPT using a Ledger Nano S hardware wallet.

What is the roadmap?

The DPT version 1 Roadmap is available on the website.

I transferred some DPT from one wallet to another and it never arrived. Can you help me?

We don't maintain, or have any control over, the wallets where you choose to store your DPT, so we can't help you directly. However, we suggest that you contact the wallet provider for both the source and destination and ask for their help. In particular, if you have a transaction-identifier (txHash) we suggest you include that in your query.

Appendix

Will be available when applicable.

Terms & Conditions

The DPT token does not have the legal qualification of a security, since it does not give any rights to dividends or interests because it is a utility token. The sale of DPT utility tokens is final and non-refundable.

DPT tokens are not shares and do not give any rights excluding what indicated in the Token section of this Whitepaper. DPT tokens cannot have a performance or a particular value outside the Deliverers Power Token Platform. DPT tokens shall therefore not be used or purchased for speculative or investment purposes. The purchaser of DPT tokens is aware that national securities laws, which ensure that investors are sold investments that include all the proper disclosures and are subject to regulatory scrutiny for the investors' protection, are not applicable.

Anyone purchasing DPT tokens expressly acknowledges and represents that she/he has carefully reviewed this Whitepaper and fully understands the risks, costs and benefits associated with the purchase of DPT.

Legal Disclaimer

This Whitepaper does not constitute a prospectus or offer document of any sort, and is not intended to constitute an offer of securities or a solicitation for investments in securities in any jurisdiction. The contents of this Whitepaper are not a financial promotion. Therefore, none of the contents of this Whitepaper serves as an invitation or inducement to engage in any sort of investment activity. This whitepaper constitutes a technical description of the functionality of the Deliverers Power Token Smart Contracts and the creation and issuance of DPT Tokens. No regulatory authority has examined or approved any of the information set out in this Whitepaper.
